

POWERFLOW AUTOMATION

About Us

- *Since 2010, With Experience of more than 14+ Years in the field of Smart Home Technology, we are an Elegant system integrator specializing in turning your Space into a Smart Space with the relevant Product and Technology.*
- *We have enhanced our clients' projects with thoughtful, sympathetic, and practical Automation system designs for over 14 years.*

What We Do?

- *We design, engineer, program, install, and maintain smart home technology and commercial control systems.*
- *We provide simple control of integrated technology and automation comprised of audio, video, lighting, motorized window shades, climate control, energy and power management, and networking.*
- *Our extensive experience with luxury home automation, expert programming, customer-focused approach, and high-quality service makes it easy for you to experience all the benefits of customized technology solutions for your home or business.*

Lighting Control

Safety & Security

Shade Control

Designer Keypads

HVAC Control

Audio Systems

Wi-Fi & Networking

Home Cinema

Lighting Control

- *Enhance your home's natural beauty inside and out with stylish lighting all controlled from one location with a lighting control system.*
- *Lighting control is only as far as your fingertips when you want to dim the lights for that dinner party and illuminate the porch for arriving guests and the environment at home.*
- *When no one is home, program your lights to say otherwise by turning them on and off at various times.*

Shade Control

- *Motorized shade control can transform a room into a remarkable space. Designer fabrics, elegant hardware, and top-notch technology ensure you have the perfect shading solution for any room or desired environment.*

HVAC Control

- *Intuitive climate control ensures the perfect temperature for every season. Whether it's cold or hot outside, your smart home will adjust to ensure complete comfort and energy efficiency.*

Designer Keypad's

- *A keypad with a small footprint does not occupy the space multiple switches might take up on any wall. It can be used as a switch alternative when home automation is deployed.*
- *Keypads and Touch screens are used in any Automation system to create the Aesthetics on the wall and to Control scenes, Individual Lights, Individual Curtains, AC's etc.*

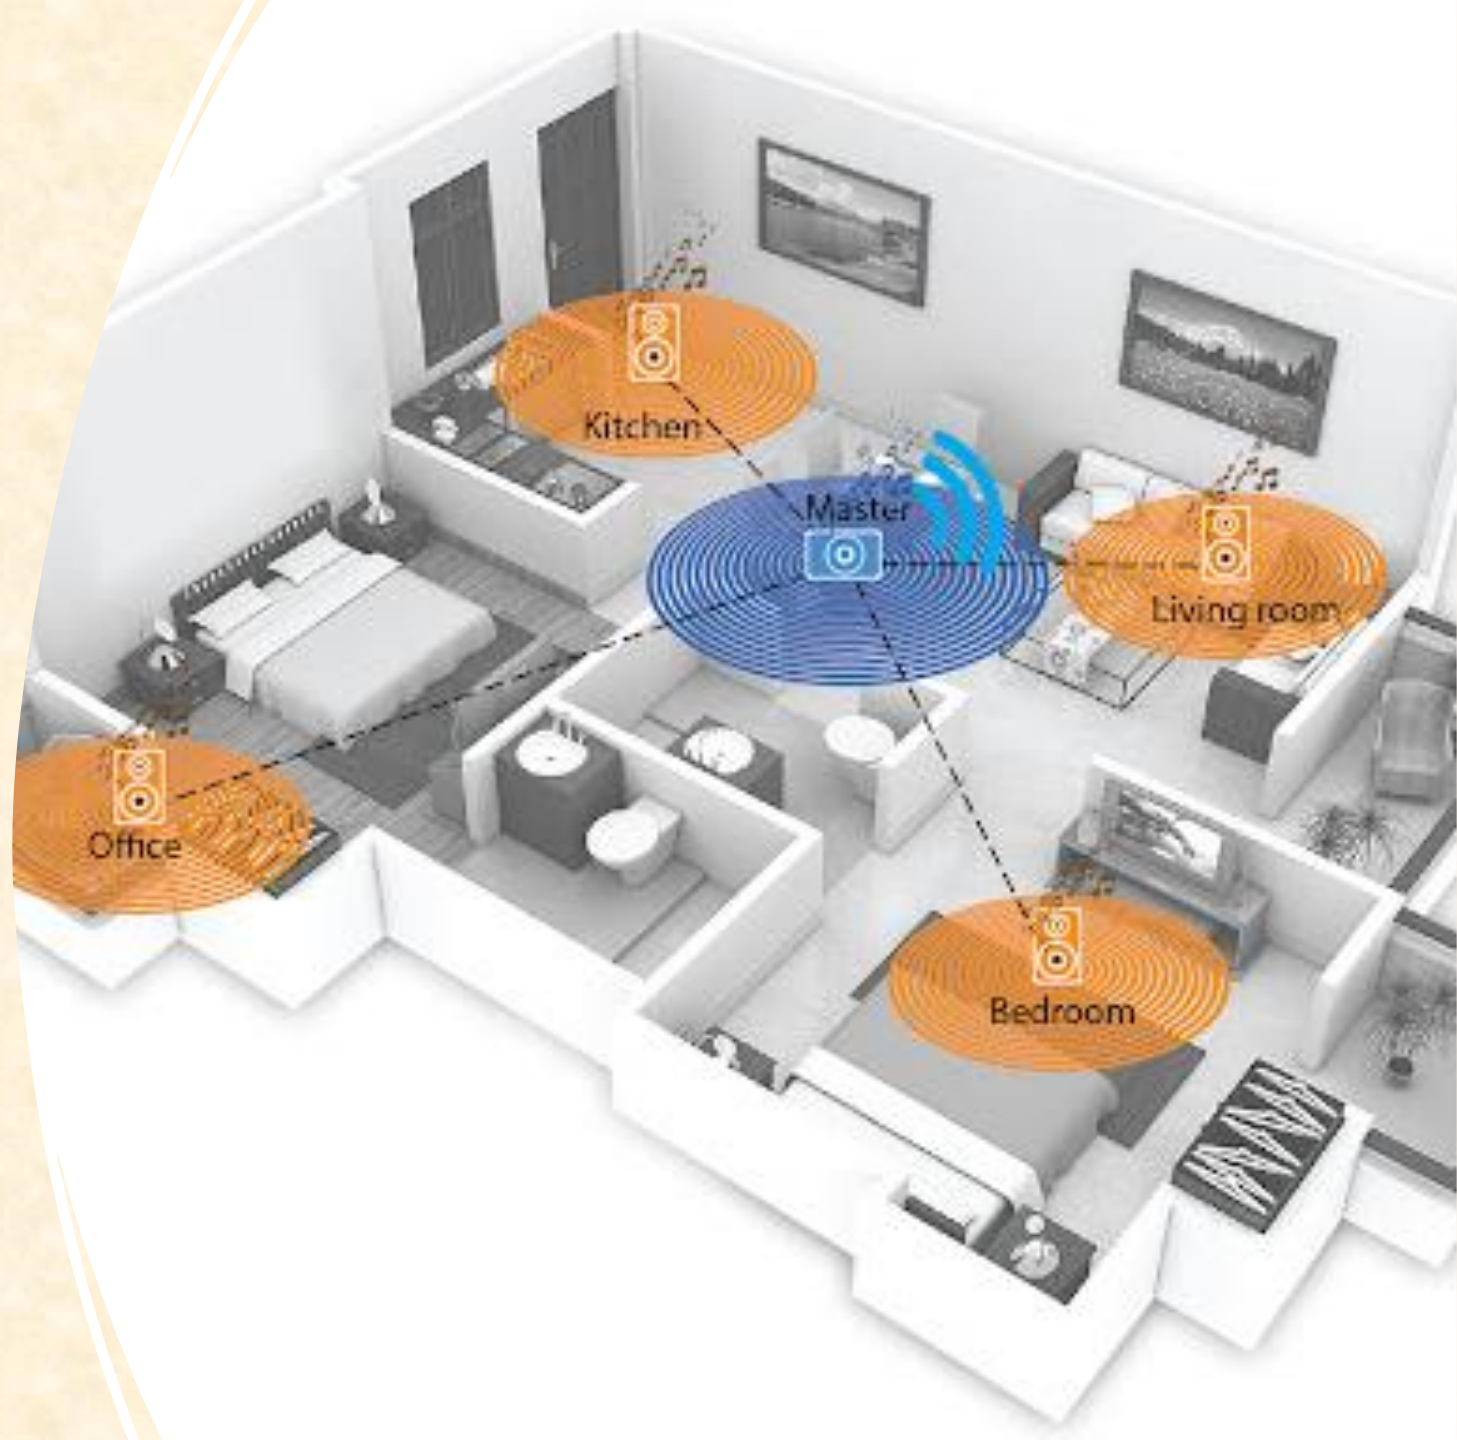

Home Cinema

- *Bring the sights, sounds, and excitement of your favorite movies to life when you have the right home theater system.*
- *A movie theater may not be a necessity in any home, but it's certainly a delight. If your family gatherings revolve around movie night—or if you love the experience of snuggling up with a great film—home theater may be worth the investment.*

Audio Systems

- ***Multi-room audio describes a network of devices – speakers, amps, soundbars, AV receivers – that enables you to play your music seamlessly around your home from a central device such as a smartphone or tablet. While this used to involve the hassle and cost of physically connecting every device in the network with cables, these days wireless connection through a home Wi-Fi hub is the norm, even for high-end setups.***

Wi-Fi Systems

- *Wireless Technology is an alternative to wired Technology, which is commonly used for devices in wireless mode.*
- *Wireless Networking has predominantly become more popular over the past few years with advancements in technology.*
- *While wireless certainly offers flexibility and convenience for the users in today's market.*

Safety & Security

- *Your home is one place where you and your family should feel safe and with an integrated security system, it's as simple as pressing a few buttons to secure what's most important to you.*
- *Integrated security means that you get more than an alarm going off or a call to a designated person –it means that we can program the system to contact your cell phone, turn on the lights in perimeters, and close the emergency shutters. Now, that's peace of mind.*

Motorized Mounts

- *Pop-up TV lifts are cool mechanical systems that hide & reveal TVs from special compartments. These compartments are often inside furniture or behind walls. With remote control operation, these systems bring a touch of luxury & surprise to any room.*
- *These lifts can fit into lots of furniture types like cabinets, bed footboards & countertops. This means you can have your entertainment system in different rooms without losing style points.*
